Lightweight Headsets for Two Way Radios

Surveillance Accessories Speaker Mics

CHECK OUR ONLINE CATALOG!

Otto manufactures audio accessories for most commercial two way radios!

The Talk-Thru Communicator

The NORCON TTU's is a 2 way audio, hands free system that provides personal communications between people separated by a barrier. The operator inside the barrier controls the operation by speaking into the microphone. This action instantly switches the TTU from a listening mode to a talking mode. The TTU reverts to its listen mode when the operator stops talking, so two people can converse clearly through the barrier.

Airline Wireless ~ no more belt packs!

Samson is the value leader in wireless microphone systems, and they've done it again! The Airline 77 Series offers solutions for any wireless demand. The headset mic system gives you a quality Samson headset mic mated to the new AH1 headset transmitter and Cr77.
